

Sealoflex Endura Reinforcing Fabric

PRODUCT DATA

Roll sizes (WxL)	15 cm x 50 m
	35 cm x 50 m
	105 cm x 50 m
Form	Solid
Colour	White

INTENDED USE

The Sealoflex Endura Reinforcing Fabric is used for reinforcement and layer thickness control with the Sealoflex Endura Waterproofing System.

DESCRIPTION

Sealoflex Endura Reinforcing Fabric is a polyester reinforcing fleece with material-reinforcing and crack-bridging properties. The mass per unit area is 110 g/m².

APPLICATION METHOD

Sealoflex Endura Reinforcing Fabric is embedded and saturated in the Sealoflex Endura Waterproof Coating resin and pressed down to remove all creases and voids.

The Sealoflex Endura Reinforcing Fabric is fully saturated wet-on-wet with the relevant Sealoflex Endura Coating.

Sealoflex Endura Reinforcing Fabric strips and lengths must overlap at least 5 cm at the transitions. The Sealoflex Endura lettering on the fleece indicates the overlap.

STORAGE

Store Sealoflex Endura Reinforcing Fabric in a dry place and protect against moisture and dampness.

HEALTH & SAFETY

Information regarding transportation, handling, storage and disposal can be found on the Safety Data Sheet and on the label of the container. All recommendations and warnings must be observed.

TECHNICAL SERVICES

Specialist advice and design guidance on all matters relating to the Sealoflex Endura System is freely available from our Technical Services Team.

We are committed to continuously enhancing and improving our product range. We reserve the right to change our product specifications. We reserve the right to correct any typographical or clerical error or omission. For the latest information contact customer service.
