

# Canopia Plug Plants

Sedum wildflower and grass plug plants for planting on extensive green roofs.

## PRODUCT DATA

<b>Plant species</b>	Various sedum, wildflower and grass species
<b>Container size</b>	65 cc to 3 litre
<b>Recommended quantity</b>	20-25 plants/m <sup>2</sup> at 65 cc plug size
<b>Delivery form</b>	Packed on trays
<b>Quantity / delivered unit</b>	Each tray contains 84 plants at 65 cc plug size. Quantity per tray will vary for larger plug sizes

## INTENDED USE

One single- or multi-layer extensive green roofs up to approximately 250 mm layer thickness.

## CARE RECOMMENDATIONS

The plants planted each day are to be watered thoroughly on the same day, i.e., the substrate layer must be completely saturated with water to stimulate root formation (usually the case if the water is clearly draining out). It is recommended to contract out completion care in the performance contract and, where applicable, agree development and/or maintenance care.

## STORAGE

The delivered plug plants can be stored in a cool, shady place in the original packaging for around 3 days, including transport times. After this, the pallets should be unpacked in a cool, shady place with the plant trays laid out and kept moderately damp.

We are committed to continuously enhancing and improving our product range. We reserve the right to change our product specifications. We reserve the right to correct any typographical or clerical error or omission. For the latest information contact customer service.
